

INTRODUCING

ACCOUNTING & OWNER FINANCIAL MANAGEMENT

Our newest feature is here to make your financial processes as simple and efficient as possible

What is it?

A feature that enables you to create, monitor and organize all of your owner statements and related financial activity.

What does it enable you to do?

Keep track of all your transactions including taxes, additional fees, recurring owner and vendor transactions and one-time transactions

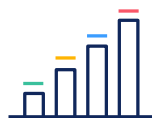

Easily set up your owner agreements and financials rules

Automatically create general ledger transactions to ensure your accounting is accurate

Maintain full transparency and control over your business financials

Produce accounting reports such as owner activity, owner balance and disbursement reports

Automatically generate your monthly owner statements

What's coming?

Guesty's Accounting and Owner Financial Management feature can help you start improving your financial operations immediately. But there's more where that came from.

This is just the first milestone in our mission to create a comprehensive accounting solution to simplify the complex task of managing your property management company's finances. In the year ahead, we look forward to releasing more solutions that simplify and streamline your financial activities.
